VulnScan Pro

Security Assessment Report

Target URL: https://testphp.vulnweb.com/

Scan Date: 2026-04-24 05:22:15

Overall Score: 67/100 (Grade: D)

Executive Summary

Security score is 67/100. Found 1 high severity issues.

OWASP Mapping

OWASP Category	CWE	CVSS	Finding	Severity
A02:2021 - Cryptographic Failures				
	CWE-298	7.4	Invalid Cert	HIGH
A05:2021 - Security Misconfiguration				
	CWE-923	7.3	Port 8008 open	INFO
	CWE-183	5.3	Missing SPF	MEDIUM
A06:2021 - Vulnerable and Outdated Components				
	CWE-1104	7.5	No WAF Detected	MEDIUM
	CWE-1104	7.5	Error connecting	INFO

Waf

Finding	Severity	Description	Recommendation
No WAF Detected	MEDIUM	No Web Application Firewall was detected in front of this application.	Consider deploying a WAF (e.g. Cloudflare

Port Scan

Finding	Severity	Description	Recommendation
Port 8008 open	INFO	Service: HTTP-Alt	

Headers

Finding	Severity	Description	Recommendation
Error connecting	INFO	Missing	Ensure target is reachable.

Ssl

Finding	Severity	Description	Recommendation
Invalid Cert	HIGH	Cert is expired or invalid	Renew cert

Dns

Finding	Severity	Description	Recommendation
Missing SPF	MEDIUM	No SPF record found	Add SPF record

Remediation Checklist

Follow these recommendations to improve your security posture:

- Renew cert
