VulnScan Pro

Security Assessment Report

Target URL: http://syniris.com/

Scan Date: 2026-02-26 07:53:17

Overall Score: 7/100 (Grade: F)

Executive Summary

Security score is 7/100. Found 4 high severity issues.

OWASP Mapping

OWASP Category	CWE	CVSS	Finding	Severity
A02:2021 - Cryptographic Failures				
	CWE-298	7.4	Invalid Cert	HIGH
A03:2021 - Injection				
	CWE-79	6.1	X-XSS-Protection	MEDIUM
A05:2021 - Security Misconfiguration				
	CWE-319	7.4	Strict-Transport-Security	HIGH
	CWE-923	7.3	Port 21 open	HIGH
	CWE-923	7.3	Port 80 open	INFO
	CWE-923	7.3	Port 443 open	INFO
	CWE-693	6.1	Content-Security-Policy	HIGH
	CWE-1021	6.1	X-Frame-Options	MEDIUM
	CWE-693	4.3	X-Content-Type-Options	MEDIUM
A06:2021 - Vulnerable and Outdated Components				
	CWE-1104	7.5	Referrer-Policy	LOW
	CWE-1104	7.5	Permissions-Policy	LOW
	CWE-1104	7.5	Cache-Control	INFO

Port Scan

Finding	Severity	Description	Recommendation
Port 21 open	HIGH	Service: FTP	Close port if not needed.
Port 80 open	INFO	Service: HTTP	
Port 443 open	INFO	Service: HTTPS	

Headers

Finding	Severity	Description	Recommendation
Content-Security-Policy	HIGH	Missing	Implement CSP to prevent XSS.
Strict-Transport-Security	HIGH	Missing	Enforce HTTPS connections using HSTS.
X-Frame-Options	MEDIUM	Missing	Prevent clickjacking by setting to DENY or
X-Content-Type-Options	MEDIUM	Missing	Set to nosniff to prevent MIME confusion a
X-XSS-Protection	MEDIUM	Missing	Enable browser built-in XSS protection (tho
Referrer-Policy	LOW	Missing	Control referrer information sent to other si
Permissions-Policy	LOW	Missing	Restrict access to browser features like ca
Cache-Control	INFO	Present	Well configured.

Ssl

Finding	Severity	Description	Recommendation
Invalid Cert	HIGH	Cert is expired or invalid	Renew cert

Remediation Checklist

Follow these recommendations to improve your security posture:

- Close port if not needed.
- Implement CSP to prevent XSS.
- Enforce HTTPS connections using HSTS.
- Renew cert
