VulnScan Pro

Security Assessment Report

Target URL: http://sspu.ac.in

Scan Date: 2026-03-16 09:42:01

Overall Score: 0/100 (Grade: F)

Executive Summary

Security score is 0/100. Found 5 high severity issues.

OWASP Mapping

OWASP Category	CWE	CVSS	Finding	Severity
A02:2021 - Cryptographic Failures				
	CWE-298	7.4	Invalid Cert	HIGH
A03:2021 - Injection				
	CWE-79	6.1	X-XSS-Protection	MEDIUM
A05:2021 - Security Misconfiguration				
	CWE-319	7.4	Strict-Transport-Security	HIGH
	CWE-923	7.3	Port 21 open	HIGH
	CWE-923	7.3	Port 80 open	INFO
	CWE-923	7.3	Port 443 open	INFO
	CWE-693	6.1	Content-Security-Policy	HIGH
	CWE-1021	6.1	X-Frame-Options	MEDIUM
	CWE-693	4.3	X-Content-Type-Options	MEDIUM
A06:2021 - Vulnerable and Outdated Components				
	CWE-1104	7.5	Referrer-Policy	LOW
	CWE-1104	7.5	Permissions-Policy	LOW
	CWE-1104	7.5	Cache-Control	INFO
	CWE-1104	7.5	Vuln at https://sspu.ac.in/	HIGH

Port Scan

Finding	Severity	Description	Recommendation
Port 21 open	HIGH	Service: FTP	Close port if not needed.
Port 80 open	INFO	Service: HTTP	
Port 443 open	INFO	Service: HTTPS	

Headers

Finding	Severity	Description	Recommendation
Content-Security-Policy	HIGH	Missing	Implement CSP to prevent XSS.
Strict-Transport-Security	HIGH	Missing	Enforce HTTPS connections using HSTS.
X-Frame-Options	MEDIUM	Missing	Prevent clickjacking by setting to DENY or
X-Content-Type-Options	MEDIUM	Missing	Set to nosniff to prevent MIME confusion a
X-XSS-Protection	MEDIUM	Missing	Enable browser built-in XSS protection (tho
Referrer-Policy	LOW	Missing	Control referrer information sent to other si
Permissions-Policy	LOW	Missing	Restrict access to browser features like ca
Cache-Control	INFO	Missing	Ensure sensitive pages are not cached.

Ssl

Finding	Severity	Description	Recommendation
Invalid Cert	HIGH	Cert is expired or invalid	Renew cert

Xss

Finding	Severity	Description	Recommendation
Vuln at https://sspu.ac.in/	HIGH	Param s vulnerable to payload javascript:alert(1)	Sanitize inputs and use prepared statemen

Remediation Checklist

Follow these recommendations to improve your security posture:

• Close port if not needed.

• Implement CSP to prevent XSS.

• Enforce HTTPS connections using HSTS.

• Renew cert

• Sanitize inputs and use prepared statements.
